Clients suffering from asthma, congestive heart failure, COPD, lung disease, sleep apnea, or cystic fibrosis will benefit from our Home Respiratory Services Program.

Home Oxygen Therapy

Health Care Pharmacy provides immediate response and set-up of all oxygen systems employed in home oxygen therapy: liquid oxygen, concentrator, oxygen conserving device, and compressed gas cylinders.

Registered Respiratory Therapists in consultation with a physician assess the client's need for home oxygen. Complete assessments include oximetry testing performed in the client's home at rest, with exercise, and with sleep. The Respiratory Therapist is responsible for the administration of oxygen therapy and the monitoring of the client's progress, and clinical status.

Our 24 hour emergency on-call service provides technical, clinical and emotional support to our client's.

Continuous Positive Airway Pressure (CPAP)

Obstructive Sleep Apnea (OSA) is a treatable disorder in which a person stops breathing during sleep, often hundreds of times during the night. Left untreated, OSA can result in high blood pressure, heart attack, stroke, vehicle and work related accidents and poor quality of life.

Nasal CPAP therapy aims to relieve OSA, improve quality of sleep, and maintains blood oxygen levels within acceptable range.

Health Care Pharmacy offers quality CPAP products, and the latest in mask interfaces to provide optimum patient care and management.

Asthma / Allergy Management

Over 2 million Canadians suffer from asthma. Asthma is the leading cause of hospital admissions among children and one of the leading causes of school absence.

Your treatment along with prescribed medicines may include the removal of obvious allergy-causing substances or irritants from your home.

Compressors for nebulized medication, spacing devices, peak flow meters, anti-allergy pillows, and mattress encasings are some of the products we carry to help you control your condition and allow you to lead an active and normal life.

Dedicated to the highest standards of home respiratory care, we are your local, community provider.

Your health is our concern.
