## *Urology*

*Freedom and Confidence*

*h o m e   h e a l t h   c a r e*

*We offer professional consultation and expertise from our registered nurses, pharmacists and home health care team in assisting you to select the product that suits your personal needs.*

### **Continence**

Health Care Pharmacy offers a wide selection of products for people experiencing bladder and bowel control problems. We recognize the need to offer our clients the opportunity to maintain and enjoy a full and active lifestyle. Adult protective garments and surface protection items such as mattress or chair covers are available to provide piece of mind and a sense of security.

We offer a selection of skin care products to manage skin breakdown often associated with incontinence.

### **Urology**

To ensure your freedom and confidence, we carry a wide range of urethral and male external catheters, urine collection systems and sterile procedural trays. Our pharmacist is available for consultation on prescribed medications designed to assist with the loss of bladder or bowel control.

### **Erectile Dysfunction**

Erectile dysfunction (ED) is the inability to achieve or maintain an erection sufficient for satisfactory sexual performance.

ED remains an underdiagnosed, clinical condition, believed to negatively impact quality of life of up to half of men aged 40-70 years.

In consultation with your physician, our pharmacist can help you improve your quality of life as well as your spouse's.

Treatment may include medication or vacuum therapy, both available through our professional staff.

Depending on eligibility and coverage, our pharmacist may be able to assist with direct billing through your insurance plan.

*Your health is our concern.*
